History

The first conference on this topic took place in 1985:
H. Dahl, H. Kächele, H. Thomä (Eds.) (1988):
Psychoanalytic Process Research Strategies. Springer
Berlin Heidelberg New York

The second took place 12 years later, in 1997:
H. Kächele, E. Mergenthaler, R. Krause (Eds.) (1999):
Psychoanalytic Process Research Strategies II. Ulm,
Ulm Textbank

Now the third conference is devoted to the evaluation of
long term psychoanalytic-psychodynamic therapies in the
times of evidence based medicine.

Long term treatments are hard to study in the frame of
RCTs; patients and therapists too often are not
motivated to accept the tight frames of such studies. So
how to generate evidence of „what works for whom“ has
been a crucial matter in many countries. Does it make
sense to maintain the distinction of efficacy and
effectiveness for long term treatments as well? Such
questions form the core of the conference and the
experiences of European researcher will provide the state
of the art on these issues.

Welcome to Ulm again!

Your Horst

Symposium

Psychoanalytic Process Research Strategies III

Ulm Conference on June 4-5-6, 2009

in collaboration with DGPT (Deutsche Gesellschaft für
Psychoanalyse, Psychotherapie, Psychosomatik und
Tiefenpsychologie)

Faculty of Medicine · Ulm University
Psychosomatic Medicine & Psychotherapy

Am Hochsträß 8, 89081 Ulm – Germany

Supported by the German Research Council
(DFG – Deutsche Forschungsgemeinschaft)

Poster

- I. Szecsódy (Stockholm) Are attachment measures (AAI & RF) suitable tools for evaluation of change: a single case study?
- S. Taubner (Kassel) & L. Elsässer (Berlin) Mentalization and Depression – Findings from the Hanse-Neuro-Psychoanalyse-Study
- S. Hörz (Munich) What can the Structured Interview of Personality Organization (STIPO) contribute to differential diagnosis and measure of outcome?
- A. Werbart (Stockholm) Quality assurance of psychotherapy in Sweden
- T. Nolte (New Haven) Neural correlates of attachment and social cognition under idiosyncratic attachment-related stress in adults. An Event-Related Potentials Study
- T. Fischmann (Frankfurt am Main) Dreaming and Psychological Change

Thursday, June 4, 2009

2 pm – 6.30 pm

Moderation N. N. (Ulm)

- G. Roth (Bremen) Do we need biological measures for evaluating long term treatments?
- D. Wiswede, H. Kessler (Ulm) & M. Cierpka (Heidelberg) Is neuroimaging a way to visualize OPD changes?

break

- A. Buchheim (Innsbruck), S. Taubner (Kassel), D. Wiswede & H. Kächele (Ulm) Neural correlates of attachment patterns in depressed patients: First findings of the Hanse-Neuro-Psychoanalysis Study
- J. Lehtonen (Helsinki) Molecular findings on serotonin transporter levels in relation to one-year psychodynamic psychotherapy of drug-naive patients with depression using the SPET brain imaging method.

Friday, June 5, 2009

9 am – 1.30 pm

Moderation E. Mergenthaler (Ulm)

- P. Fonagy (London) Mentalisation as a common factor in the psychotherapeutic process.
- F. Leichsenring (Gießen) & S. Rabung (Hamburg) The effectiveness of long-term psychodynamic psychotherapy: a meta-analysis.

break

- T. Grande, W. Keller, Th. Jakobsen & G. Rudolf (Heidelberg-Berlin) Preconditions and effects of structural change in the Heidelberg-Berlin Study of psychoanalytic long-term psychotherapy
- R. Sandell (Stockholm) An individual differences perspective on treatment outcome.

2.30 – 7 pm

Moderation F. Pfäfflin (Ulm)

- O. Lindfors, P. Knekt, C. Renlund, P. Haaramo, M. Laaksonen, T. Härkänen, E. Virtala and the Helsinki Psychotherapy Study Group (Helsinki) The effectiveness of psychoanalysis and long- and short-term psychotherapy on psychiatric symptoms – a 5-year quasi-experimental follow-up study.
- D. Huber & G. Klug (Munich): The longer the better? Psychodynamic long-term psychotherapies and cognitive-behaviour therapy in comparison.

break

- P. Luyten (Louvain) Different folks need different strokes: An interpersonal-psychodynamic approach to the treatment of patients with personality disorders
- B. Strauß (Jena) Do interpersonal and attachment characteristics tell us something about desirable treatment lengths?

Saturday, June 6, 2009

9 am – 1.30 pm

Moderation D. Pokorny (Ulm)

- Th. Jakobsen (Basel) What happens when the symptoms don't change?
- J. Zevalkink (Nederlands Psychoanalytic Institute – Dutch Psychoanalytic Society) A study of the effects of long-term psychoanalytic psychotherapy/psychoanalysis

break

- M. Leuzinger-Bohleber (Frankfurt) & M. Beutel (Mainz) Psychoanalytic and cognitive-behavioral treatment: First data on the LARC depression study
- I. Harpaz-Rotem (New Haven) Pathway to therapeutic change: change in self-representation in long-term psychodynamic treatment of adolescents and young adults

2.30 – 4 pm

Moderation K. Münch (Bremen)

- R. Krause (Saarbrücken) The German system for the evaluation of public payment of psychotherapeutic treatments. The case of client centered psychotherapy. Experiences of a long term scientific adviser to the Federal Commission to evaluate curative tools.
- R. Richter (Berlin) Psycho-politics – comments from the president of the German Chamber of Psychological Psychotherapists

break

Moderation A. Sellschopp (München)

- H. Kächele (Ulm) Recommendations for future psychoanalytic treatment research.
